POOL COVERING SYSTEM

Are you **COVERED?**

Why Choose HPI

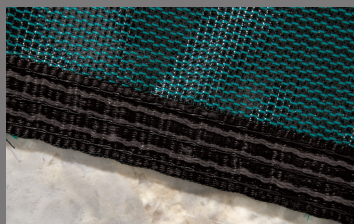

We are the industries trusted name in safety covers! With nearly thirty years experience in manufacturing we have come up with the styles, techniques, and process' you need to ensure a long lasting and perfect fitting cover. These covers are built to last with quality in mind always. Our craftsmanship and design are what set us apart from the competition. The custom designed hardware makes all installations a breeze. The detail we put into these beautiful covers will keep your backyard looking fantastic all year round and provide you the peace of mind you and your family deserve. These covers are made in Canada, by Canadians, for Canadians.

ASTM (ASTM F 1346-91)

All of our covers have met and exceeded the rigorous testing methods set forth BY ASTM (American Society for Testing and Materials). These tests are to ensure that the product is capable of performing to the set standard of quality and safety.

Compare These Industry-Leading Features

QUALITY CONTROL

- Consistent quality is ensured throughout the manufacturing process with systematic checks and the issuance of a signed inspection card for every cover.

STRENGTH AND DURABILITY

- All perimeter points feature cross-stitched reinforcement. Specially treated, U.V. resistant polyester thread is used throughout the cover.

SOLID CONNECTIONS

- Corrosion-resistant brass anchors with stainless steel springs secure your cover and fit flush to the deck when not in use.

PROTECTIVE RUB STRIP

- Industry leading 22" soft component rub strips protect the cover and your pool coping from excessive wear.

DOUBLE-LAYERED STRAPPING

- The HPI difference - we sew strapping on the top AND the bottom of our covers. Our entire grid pattern is double webbing ensuring the cover material is sandwiched between the strapping. We use 40 Percent more webbing than most of our competition

IDENTIFICATION CODE

- An industry first! Each cover has a registered serial number sewn into the cover perimeter. If the cover ever needs replacement, a duplicate cover matching all straps to your existing anchors is easily manufactured.

Hardware

Springs

- We have them all! All HPI Springs are available with OR without the 'D' Ring attachment. Our BlocMesh99 and solid covers ship with the dual barrel spring while the standard mesh covers ship with the single spring. Standard mesh covers can be upgraded upon request! All HPI springs now have the 'Sleeve Saver' plastic clip which will hold the vinyl sleeves in place. No more aggravation at installation, openings or closings!

Wall Anchors

- Our standard wall anchor is a 3" long cable OR 'D' Ring holder keeping the cover held tightly to any raised obstruction. This anchor is also available in 6" length upon request

Interlock (Paver) Anchors

- Our stainless steel Interlock/Paver stakes are 9" long. We also have 18" long available by request. Our Stakes come with the brass anchor already installed in the top.
